Who regulates electricity in Jamaica?

MSET (Ministry of Science, Energy, and Technology) is the government institution responsible for energy. NEPA (National Environment and Planning Agency) is responsible for permitting and tracking all environmental impact assessments. OUR (Office of Utility Regulators) is responsible for regulating Jamaica's electrical sector.

What is Jamaica's energy source?

This page is part of Global Energy Monitor's Latin America Energy Portal. Oil and natural gas continue to supply most of Jamaica's energy, supplemented by significantly smaller contributions from renewables. As of 2020, nearly 89% of electricity was still generated by fossil fuels.

How much electricity does Jamaica have?

As of 2020, Jamaica's installed electrical capacity was 1156 MW, supplied primarily by fossil fuels (83.73%), followed by wind (8.82%), solar (4.93%) and hydro power (2.52%).

Is Jamaica following the National Energy Policy 2009-2030?

Jamaica is currently following the National Energy Policy 2009-2030. Jamaica's December 2020 update to its NDC (Nationally Determined Contribution) aims to reduce greenhouse gas emissions by more than 25% relative to business as usual levels by 2030, with the majority of reductions coming from the energy sector.

What makes Brand Jamaica unique?

The uniqueness of Brand Jamaica has been taken to a whole new level with the establishment of the state-of-the-art Club MoBay VIP Lounge at Sangster International Airport, which is unlike any hospitality facility of its kind to be found elsewhere in the world.

What percentage of Jamaica's electricity is lost?

More than a quarter (26.5%) of Jamaica's electrical output is lost through poor transmission and distribution infrastructure. In 2018, the peak demand was 655 MW, and 97% of the population had access to electricity. In 2016, Jamaica consumed 2.847 billion kWh. Jamaica has no coal reserves and does not produce coal.
