The 2020 Solar Energy Market In Japan. Back in 2011, the share of renewable energy in electricity generation in Japan was only around 10%. That number has since doubled with 2020 showing numbers as high as 19.8%. There are several reasons for such growth largely connected to the country's recent history.

With solar power continuing to gain traction as a primary renewable energy source, the number of panels reaching the end of their lifespans is projected to start rising sharply in the mid-2030s.
