Dedicated to the highest standards, our team works earnestly to help you -- and your equipment -- reach new standards of performance. From a one-off repair to integrated performance and reliability solutions you can count on unbeatable response, every time.

Large language models have shown remarkable aptitude in code generation, but still struggle to perform complex tasks. Self-repair -- in which the model debugs and repairs its own code -- has recently become a popular way to boost performance in these settings. However, despite its increasing popularity, existing studies of self-repair have been limited in scope; in ...
