The signing ceremony of the agreement on the construction of the 1GW wind power station in Kazakhstan by the UAE's Masdar. Photo credit: masdar.ae. The United Arab Emirates (UAE) state-owned clean energy company Masdar announced the construction of a large-scale 1GW wind power station in Kazakhstan.

Who is involved in a wind power project in Kazakhstan?

Spearheaded by Masdar, the wind power project will involve Abu Dhabi-based W Solar, Qazaq Green Power renewable company, and the Kazakhstan Investment Development Fund (KIDF).

Who accredits Qazaq Green?

The association holds accreditation from the Ministry of Energy and the Ministry of Ecology and Natural Resources of the Republic of Kazakhstan, as well as the Atameken National Chamber of Entrepreneurs of Kazakhstan. Qazaq Green has successfully implemented several initiatives to promote renewable energy.

Can Kazakhstan transition to a greener economy?

It's no secret that Kazakhstan has a long way to go in transitioning to a greener economy. With its energy and GDP historically largely sourced from fossil fuels - predominately oil, coal and natural gas - it faces an uphill battle in carrying out a green transition.

Are energy prices a social concern in Kazakhstan?

The report recognises that energy prices are a significant social concern in Kazakhstan. A rise in prices for liquefied gas used in vehicles contributed to the unrest that gripped the country in January 2022. However, low prices have made it difficult to diversify the types of energy used for the domestic market and to promote energy efficiency.

How much wind power does Kazakhstan have?

It has been estimated that about half of the country records wind speeds of 4 to 5 metres per second. Although wind only makes up a fraction of the energy mix at present, the country developed, in conjunction with the UN Development Programme, a plan for wind energy. Under the plan, Kazakhstan aims to reach 2,000 MW of wind power by 2030.
