

What does Kyon energy do?

Kyon Energy projects and operates storage technologies for an independent, sustainable and socially acceptable energy supply. Kyon Energy works for a world with an independent, sustainable and socially acceptable energy supply through renewable energy sources. Kyon Energy is a developer of battery storage for the grid.

Will Kyon energy & obton have a joint storage facility?

The joint implementation of the storage facilities has already begun. The transactions are part of a comprehensive framework agreement between Kyon Energy and Obton, which was concluded end of 2022. In the first year of the agreement, a third of the storage capacity - around 200 megawatts - has already been successfully contributed.

When will Kyon energy's 4th storage project be completed?

The transaction of a fourth project with a storage capacity of 20.7 MW will be completed by the end of the year. The joint implementation of the storage facilities has already begun. The transactions are part of a comprehensive framework agreement between Kyon Energy and Obton, which was concluded end of 2022.

Is Kyon energy a driver of the energy transition?

Kyon Energy is therefore an active driver of the energy transition. The expansion of renewable energy sources is a central prerequisite for the energy transition. But the current electricity infrastructure is not designed for high volatilities - instability in the power grid, high prices and increased congestion are the result.

The transactions are part of a comprehensive framework agreement between Kyon Energy and Obton, which was concluded end of 2022. In the first year of the agreement, a third of the storage capacity - around 200 megawatts - has already been successfully contributed.

Munich, 31.10.2024 - The project development company Kyon Energy, which specializes in the planning and implementation of large-scale battery storage projects, is strategically broadening its base and expanding its business model. In addition to its existing project development and EPCM (Engineering, Procurement, Construction, and Management) activities, Kyon Energy will also ...

Kyon Energy, ein führendes Projektentwicklungsunternehmen von Batterie- und Speichersystemen, hat die Genehmigung für ein neues Batterie- und Speicherprojekt in Alfeld (Leine), Niedersachsen, erhalten. Die Anlage wird eine Speicherleistung von 137,5 Megawatt und eine Speicherkapazität von 275 Megawattstunden erbringen und ist damit das ...

Kyon Energy plans and builds grid-connected battery storage systems. Through future-oriented application scenarios, these stabilize the power grid and enable a clean, independent and socially responsible energy

Kyon energy solutions Norway

supply with renewable energies. They ...

Kyon Energy plans and builds grid-connected battery storage systems. Through innovative business models and future-oriented application scenarios, these stabilize the power grid and ...

Kyon Energy entwickelt sich zum ganzheitlichen Flexibilitätsanbieter im Energiemarkt. Mit dieser Erweiterung unseres Geschäftsmodells werden wir künftig - neben der bisherigen Projektentwicklung und Tätigkeit als EPCM - auch als Betreiber von Großbatteriespeichern aktiv. „Mit dem Einstieg in den Betrieb von Großbatteriespeichern ...

Kyon Energy hat seit seiner Gründung Speicherprojekte mit einer Leistung von 770 Megawatt entwickelt. 120 Megawatt sind bereits in Betrieb, 350 Megawatt im Bau und 300 Megawatt baureif. Mit einer Projektpipeline von über 7 GW ist Kyon Energy einer der Marktführer in Deutschland. Die folgenden Referenzen stellen einen Auszug unserer abgeschlossenen ...

Kyon Energy focuses on energy storage technologies within the renewable energy sector. The company's main services include the development, planning, and operation of storage technologies for a sustainable and socially responsible energy supply.
