

What is the largest solar park in Latvia?

This will be European Energy's first project in Latvia and the largest solar park in Latvia. The Targale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green energy annually, providing around 52,000 households with their annual electricity consumption.

Will there be a solar panel Park in Latvia?

Work has already begun on the assembly of the panel structure to prepare for the laying of the panels," Berzins said. Merito, which is the owner of Kalkunes SES, will have eight such solar panel parks in Latvia, said Maris Plume, board member of the fund's cooperation partner, the company "Saules Energy" (Solar Energy).

What is European energy doing in Latvia?

European Energy started developing renewable energy projects in Latvia in 2021, and with the opening of its office in Riga, four employees have joined the company in Latvia to develop a strong pipeline of renewable energy projects in the country.

How much electricity will the Daugavpils solar power plant produce?

Annually, the solar power plant will produce 13,500 megawatt-hours of electricity, which will be enough to fully supply at least 6,500 households in the Daugavpils area. "We are located in Kalkune parish, we will start work here, we will build a solar panel park.

Latvia has ambitious climate goals, aiming for 57 percent of its electricity consumption to come from renewable sources by 2030, according to the International Energy Agency (IEA). However, the development of solar parks in Latvia has so far been slower than in its Baltic neighbours. In 2023, the country had only 500 MW of solar capacity.

Derex has installed a 2.1MW floating solar farm in Latvia to power the Sloka wastewater treatment plant. By 2023, the Sungrow-designed system using RECOM Technologies' modules will reduce electricity costs and reliance on energy market rates while protecting the local ecosystem.

Latvia's Solar Rooftop Country Profile. April 2024. Red = 0-1 points. Orange = 2-3 points. Green = 4-5 points. This country profile highlights the good and the bad policies and practices of solar ...

Latvenergo AS, Latvia's leading energy company, has acquired 100% of the capital shares in DSE Aizpute Solar SIA from Danish developer Danish Sun Energy ApS to build a solar power plant with a total capacity of 265 MWp by the end of 2025. The total construction costs of the solar park are estimated at up to EUR 135 million.
