What is ramathole solar power project in Lesotho?

The project will be under the direct supervision of Lesotho Electricity Generation Company (LEGCO). The 70MW Ramathole solar power project is planned to be implemented and built in two phases: Phase I: 30MWp with construction period of 18 months and Phase II: 40MWp to be completed in 2030.

How much does Lesotho government contribute to solar power project?

Lesotho Government Contribution to this project is estimated at M220 million which will cover the costs of land compensations valued around M57 million, Tax obligations as well as operating costs of Lesotho Electricity Generation Company (LEGCO). The government is implementing 70MW solar electricity generation project at Ramathole in Mafeteng.

Will Lesotho build its first IPP solar project?

Scatec has entered an agreement with the Lesotho Electricity Company and the Government of Lesotho to build the country's first IPP solar project of 20MW. The Power Purchase Agreement, and Connection Agreement and Implementation Agreement were signed at an official ceremony in Lesotho capital Maseru last week.

Who financed 30MW solar project in Lesotho?

A Chinese based contractor SINOMA-TBEA Consortium has been engaged to construct the 30MW solar project. The project is under the direct supervision of Lesotho Electricity Generation Company (LEGCO). Phase I (30MW) of the project is financed by a soft loan from EXIM Bank of China with total contribution of USD 70.188 million.

Will Scatec develop a solar project in Lesotho?

Scatec general manager for sub-Saharan Africa, Jan Fourie, said: "We are proud to be the first IPP to develop a solar project in Lesotho, an important step for Scatec in the country. "The Southern African region is a key market for Scatec, and a region with great potential for the development of affordable clean energy.

Does Lesotho have electricity?

Scatec will build, operate and majority own the facility under a 25-year Power Purchase Agreement with financial close expected early next year. Lesotho relies mostly on hydropower but is not energy secure and energy access rates are low. Only around 6% of rural households are connected to the grid.

Representing the country's first-ever utility scale solar project, as well as the first independent power producer (IPP) project, the grid connected plant will be significant in the country's journey to a green energy future while furthering the ...

On 17 May 2021, lawyers acting for FSG served notice to the Trans-Caledon Tunnel Authority Soc. Ltd
