

# Liberia ralux solar racking systems

The Upper + Lower system is the ideal solution for the installation of photovoltaic panels arranged horizontally with an inclination of 8°; Through an innovative adjustment system for the upper component, the system allows it to be installed with all photovoltaic panels on the market in full compliance with the manufacturer's manual.

Los sistemas Rino se adaptan a cada proyecto. La profundidad, la distancia entre los postes y las secciones de los postes se estudian cuidadosamente y se proponen a nuestros clientes después de un cuidadoso análisis del estudio geológico y la prueba de extracción del suelo donde se instalará la planta fotovoltaica.

Ralux Solar is a professional company. The manufacture of the products in the Ralux Solar catalogue is carried out at the production plants of Ralox Spa, a world leader in aluminium extrusion with more than 25 years of market presence. Expert structural engineers work in the engineering and product development department and, with the help of the country managers in each ...

AERODINMICOS. AEROALTO DUO. El sistema se puede utilizar tanto para orientar los paneles hacia el sur, como para una configuración este-oeste. También existen alfombras de goma Epdm para instalaciones en cubiertas con revestimiento epoxico o TPO que permiten mantener el revestimiento intacto incluso en el caso de contrapesos considerables.

El Microrail es la solución ideal para instalaciones en lámina trapezoidal con una distancia cercana entre las crestas. De hecho, este sistema se fija directamente a la cubierta del techo, reduciendo al máximo los componentes tiles y ...
