

Lucid energy storage Japan

Does lucid use Panasonic Batteries?

Lucid will use Panasonic batteries in its long-range Lucid Air and its Gravity SUV, which will begin production in 2024, the company said. In August Lucid halved its EV production forecast blaming extraordinary supply chain and logistics challenges.

Will lucid and Panasonic's assessments change?

Lucid and Panasonic anticipate that subsequent events and developments will cause Lucid's and Panasonic's assessments to change. However, while Lucid and Panasonic may elect to update these forward-looking statements at some point in the future, Lucid and Panasonic specifically disclaim any obligation to do so.

Why did lucid halve its EV production forecast?

In August Lucid halved its EV production forecast blaming extraordinary supply chain and logistics challenges. The company, which says it has 37,000 reservations, now expects to produce between 6,000 and 7,000 luxury electric vehicles this year. Our Standards: The Thomson Reuters Trust Principles.

Is Lucid Air a luxury car?

The company's first car, Lucid Air, is a state-of-the-art luxury sedan with a California-inspired design that features luxurious full-size interior space in a mid-size exterior footprint. The Lucid Air Grand Touring features an official EPA estimated 516 miles of range or 1,050 horsepower.

Lucid Group LIB 2022 10 31 (De Soto)

The agreement marks another milestone in Panasonic's plans to expand production of lithium-ion EV batteries beyond Japan and into the U.S., with production coming from both a facility in Japan, as well as expected future production from its recently announced battery production facility in De Soto, Kansas.
