

Is Luxembourg on the right track to achieve its green energy goal?

Luxembourg is on the right track to reach its objective with its green energy development support project, 'Green Relance for Luxembourg'. Renewable energies are still on the rise within the European Union, which has set the goal for green energy to reach 32% of energy usage by 2030.

Is Luxembourg ready for a green energy transition?

Renewable energies are constantly on the rise, steadily gaining ground on the path to energy transition. Luxembourg is on the right track to reach its objective with its green energy development support project, 'Green Relance for Luxembourg'.

What are the 5 dimensions of Luxembourg's climate plan?

This plan has 5 dimensions in which Luxembourg can act: research, innovation and competitiveness. In order to achieve the objectives of the Paris Agreement, the national climate objective for Luxembourg is to reduce greenhouse gas emissions by 55% by 2030.

Will Luxembourg overachieve the LULUCF no-Debit commitment?

It is well noted that Luxembourg plans to overachieve by 10 to 15 percentage points this target while complying with the Land Use, Land use Change and Forestry (LULUCF) no-debit commitment (i.e. emissions do not exceed removals).

What are Luxembourg's best practices?

Another good practice is the Climate Pact, where Luxembourg has shared best practices among its 98 municipalities, engaged local administrations to initiate projects and mobilised EUR 55.2 million in terms of investment, paving the road for the implementation of the NECP.

How will the LULUCF sector improve carbon management?

Since forests have a significant natural carbon storage potential, the targets for net greenhouse gas removals in the LULUCF sector will be strengthened. In addition, an aid scheme for the sustainable management of private forests, the Klimabonus B&S, will be established.
