

Malaysia national portal for rooftop solar

How is Malaysia promoting rooftop solar generation?

27 Dec 2023 MALAYSIA has been actively promoting rooftop solar generation since 2005, with various legislation and incentive schemes. It began with the launch of the Building Integrated Photovoltaic (BIPV) programme in 2005 to increase the uptake of solar photovoltaic (PV) technology.

Will Malaysia develop a rooftop solar buyback programme?

The Government of Malaysia has announced plans to develop a rooftop solar buyback programme and to incentivise rooftop solar installation by extending the current net energy metering (NEM) programme to December 31, 2024.

How can a rooftop solar PV system help a home?

Despite schemes such as FiT, NEM 2.0 and NEM 3.0, more can be done to boost rooftop solar PV installations in residential properties. Nirinder suggests allowing larger size solar PV systems, particularly for households contending with high electricity bills. This will enable them to actually recover a higher percentage of their investment costs.

Which countries have a large scale solar PV project in Malaysia?

performance. Meanwhile, there are three large scale solar PV projects that have already been awarded in Peninsular Malaysia with a cumulative capacity about 70 MW (located at Tolk Uban lake in Kelantan and in uala Langat). In addition, Sarawak has already initiated plans to trial 30 MW of floating solar PV at the Batang Ai hydroelectric plant

Why should you choose solar energy in Malaysia?

Steadily serving Malaysia since 1949, we are with you all the way from design, installation up to maintenance. You can generate your own electricity and sell the excess to us. Solar energy is green, sustainable and does not emit pollutants when produced or consumed.

Can a solar PV system be installed on a rooftop?

The government is also calling for companies to offer a model for residential rooftop solar installation that requires zero capital expenditure, such as those offered by Petronas's green energy unit Gentari. SEDA Malaysia is leading by example with the installation of the 16kW solar PV system on the rooftop. (Photo: SEDA)

The Government of Malaysia has announced plans to develop a rooftop solar buyback programme and to incentivise rooftop solar installation by extending the current net energy metering (NEM) programme to December 31, 2024.

Due to the overwhelming response from the PV industry and to boost the usage of Solar energy, the Energy
