

Mauritania energy trading co ltd

Is Mauritania poised to become a major supplier of natural gas?

Mauritania is poised to become a significant global producer of natural gas and a leading player in Africa. With estimated gas reserves of 1400 billion cubic meters, the country has the potential to become a major supplier in the global market.

Is green hydrogen an emerging market opportunity in Mauritania?

Green hydrogen is an emerging market opportunity in Mauritania, given the availability of about 700,000 square kilometers in the country for the installation of solar panels and/or wind turbines for power generation, according to the Ministry of Petroleum, Mines, and Energy.

Should Mauritania invest in wind energy?

A major investment in wind energy infrastructure in Mauritania could not only provide a significant source of renewable energy for the country, but also make a significant contribution to global efforts to reduce reliance on fossil fuels and combat climate change.

Can Mauritania harness wind energy?

Mauritania also possesses significant potential for harnessing wind energy. The country is blessed with strong and continuous wind most days of the year, with an average wind speed of 7 meters per second. This makes it ideal for both onshore and offshore wind farm development.

Is Mauritania a sustainable country?

Mauritania is making great strides in the realm of renewable energy. Their commitment to a sustainable future is evident in their increasing use of natural resources to generate electricity. In 2008, a mere 1% of electricity came from renewable sources, but by 2020, that number had grown to an impressive 37%.

What is Mauritania's strategic plan?

Mauritania, as outlined in Mauritania's ambitious three-step strategic plan for the future development of its petroleum, mines, and energy resources from 2022 to 2030.

Established as a company following a consortium that includes Masdar, EDF Energy and Nesma Co. Ltd., to operate the Dumat Al Jandal wind power plant, which is the first of its kind in the Kingdom of Saudi Arabia, and the largest in the Middle East. Located in the Al Jouf area, the plant's production capacity is 400 MW, at a capital cost of up ...

Mauritania intends to conditionally reduce its greenhouse gas (GHG) emissions by at least 92% by 2030. In 2020, the country adopted a national strategy to transform its energy sector and aims to increase the share of renewables in its energy mix to 60% by 2030, in line with its nationally determined contributions (NDCs) under the Paris Agreement.. To this ...
