UPS battery backup is a safe way to protect your PC and electronics. You must use the same precautions as you would with any battery--protect it from temperature extremes or being hit with heavy objects--but choose a UPS power supply from a reputable company and it will be certified to meet all relevant Canadian safety regulations.

When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment. APC, a flagship brand of Schneider Electric, offers UPS options ...

These equipments are accompanied by battery systems that are the ones that give autonomy according to the time that the UPS needs to be delivering energy. High performance, uninterruptible service and energy efficiency

The APC BR1500G Backup Battery is pretty large in terms of size. It has five battery backup and surge-protected outlets and another set of five outlets with only surge protection, for a total of ten. However, there are no USB ports to plug in your phone directly. There"s also a small backlit LCD that shows plenty of information at a glance.

With a 3-cell battery, fast CPU and discrete video, even with a brand-new battery you"ll probably see well under two hours battery run. With a 6-cell battery, i5 CPU and integrated video you can probably get 6-8 hours out of a new battery.

This switchover to battery power takes a little time (a few milliseconds), which is not too much of a problem for computers with switch-mode power supplies, but it can cause problems for more sensitive equipment. Off-line UPS systems are the most economical but should be used only at workstations or for individual use.
