Energy Efficient Ethernet (EEE), defined in the IEEE 802.3az standard, is a set of enhancements to the traditional Ethernet networking standard designed to reduce power consumption during periods of low data activity. The objective of EEE is to save energy without sacrificing compatibility with existing equipment and networks.

Meraki access points with an integrated Bluetooth Low Energy radio have the ability to transmit BLE Beacons, as well as to scan and locate BLE devices. Client devices like smartphones "hear" the BLE Beacon emitted by a Meraki AP, and an app on the smartphone can respond to a recognized Beacon.
