

Mexico all powers generator

The Reform Bill proposes the revocation of all power generation permits awarded to private producers as well as related contracts, and strictly limits the generation of electricity for its exclusive sale to CFE, substantively modifying the electric market.

This approach will affect users of all sizes and scales, making the quality and pricing of energy goods and services as unpredictable as the shifting tides of political will. This anticompetitive edge will strain U.S.-Mexico relations by hindering North American market integration and creating barriers between the two economies. [25]

Generators can decide the amount of its total energy to offer in these auctions and may reserve the remaining to participate using other mechanisms. This market mechanism reduces investment risks as power generators secure a stable income that enables them to recover their variable and fixed costs, even when the electric utility is not yet built.

A new type of "mixed generators" will be created, where the Mexican state will participate with at least 54% of the investment, and the balance may come from private investment. All other generators will be allowed to participate in the Mexican market, provided they comply with the requirements of safety and reliability of the national grid ...

Reclassify the electric power industry as a "strategic" sector under the Mexican constitution, thereby granting the Mexican government control over power generation, transmission, transformation, distribution, marketing and supply.

The bill provides that Clean Energy Certificates (CELs) can be granted to clean power generation facilities, regardless of their ownership and the time the power station started operations. This means that all of CFE's clean energy power stations will receive CELs.
