How does a solar generator work?

Solar generators harness sunlight to generate energy. Generators are especially useful for generating passive power for machines on the ground rather than depleting your primary reserves. During operation, it will generate 1200 J/s (60 J/t) through the bottom of the panel base. It has a small internal energy buffer of 96 kJ.

How do I use an advanced solar generator?

Advanced solar generators only produce electricity during the day. A multimeter cable or other compatible cord can be connected to the edge of the base with the green square. Right click on the generator with a wrench or Configurator set to Rotate to rotate the entire assembly. Bio-Generators produce electricity from Biofuels.
