

Modula storage Bouvet Island

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.

What types of storage options does Modula offer?

Internal and external bays, with single or dual delivery levels, displaced bays, with standard or oversize unit heights. Modula offers a unique range of configurations, so you can choose the ideal type of product for each kind of storage and see which one best suits your needs for space, picking and refilling.

What is a Modula automatic vertical tray warehouse?

Modula automatic vertical tray warehouses allow you to store goods in a clean, tidy, safe and fast-moving system, reducing the number of movements operators need to make and avoiding damage to your goods. Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency.

How much inventory can Modula store?

The Modula system was able to store approximately 90% of our inventory - we couldn't believe it! Modula saves us hours every day in set up time and the convenience of having all our inventory in one location. When we needed service, we had it within a couple hours of our call and the problem was solved. We are really happy.

Why should you choose Modula storage & picking system?

The Modula storage and picking system can be equipped with additional options for automated vertical warehouses, to make picking more efficient, to make picking and order preparation more efficient, help the operator while picking and refilling, carry out other processes in a more linear way or even improve performance and consumption.

Why should you choose Modula lift VLM warehouse?

A large number of companies have already chosen Modula Lift vlm warehouse for its flexibility, wide range of models, design and ease of use. Among automated storage systems, the Modula Lift automatic vertical warehouse is the best fit for any structural and working requirements. If playback doesn't begin shortly, try restarting your device.

A Modula VLM is an automated vertical storage system that takes up a minimal amount of space. These systems can store large quantities of products in a safe, secure environment and making them available to the operators in an elegant way with a scan of a barcode or one touch of the user-friendly Copilot controller.
