

What is the energy sector in Tunisia?

The energy sector in Tunisia includes all production, processing and transit of energy consumption in this country. The production involves the upstream sector that includes general oil and gas, the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas, and varied electrical/renewable energies.

How much electricity does Tunisia get from renewable sources?

Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW). In addition to wind and hydro, the Tunisian government plans to use biogas to produce renewable energy.

Does Tunisia have a green wave of energy production?

This creates the overlap for biogas to take on some level of energy production in Tunisia's continued green wave of energy production. In 2016, Tunisia emitted 29 Mega tons of carbon dioxide equivalent (MtCO_{2e}) in greenhouse gasses. The country aims to reduce its carbon intensity by 13% in 2030, compared to 2010 levels.

Is Tunisia a natural gas producer?

Sousse thermal power station, combined gas cycle belonging to STEG. Wind farm of Sidi Daoud. Tunisia is a small producer of oil and natural gas. Oil production began in 1966, at 118,000 barrels/day in 1980, and reached 63,000 barrels/day in 2015. The country is a net importer from the year 2000 onwards.

Does Tunisia have a solar power plant?

First utility-scale photovoltaic plant (10 MW, in Tozeur) was commissioned in 2019 on German money. Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW).

Could nuclear energy be a viable alternative to fossil fuels in Tunisia?

The Tunisian government has partnered with Russia and France in hopes of establishing nuclear energy as a viable alternative to fossil fuels and taking up a nontrivial chunk of the energy production in Tunisia. This is expected to be accomplished in the 2020s. Sousse thermal power station, combined gas cycle belonging to STEG.

NDI works with Tunisian civil society organizations (CSOs), elected officials locally and nationally, and other democratic stakeholders to support transparent, accountable, participatory, and inclusive governance that can meet the needs of the Tunisian people and protect their core democratic freedoms.

In June 2023, the World Bank approved US\$268.4 million in financing for the Tunisia-Italy interconnector (ELMED) project that will link energy grids between Tunisia and European markets, with the eventual aim for Tunisia to export excess renewable energy.

Olive oil is an integral part of Tunisia's economy and livelihood, comprising half of the country's agricultural exports. Given that Tunisia is the second largest producer of the commodity globally, the industry generates a significant source of income, especially in rural areas. However, it simultaneously creates local waste management and environmental ...
