

Niger solar hybrid system

Are there any off-grid solar energy systems in Niger?

There is considerable experience of off-grid PV electrification, water pumping and solar water heating systems in Niger. Each of these will be explored below. The main decentralised renewable energy system being promoted in Niger for rural electricity is solar PV.

Will a 20 MW grid-connected solar PV system perform in Niger?

A financial analysis has been made as part of the pre-feasibility study of a 20 MW grid-connected solar PV system near Niamey under negotiation at pres-ent. It provides a concrete example of how grid-based systems are likely to perform under the resource and macroeconomic conditions prevalent in Niger.

Does Niger have solar power?

Before moving ahead,further data need to be collected and analysed to ensure their potential and viability. Niger enjoys high solar radiation conditions in all eight of its regions. Average solar radi-ation is 5-7 kWh/m2 per day (figure 9),and there are seven to ten hours of sunshine per day on average.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.
