

Noble solar Syria

Does Syria have solar energy?

Northeastern Syria, which is mostly under the control of the Autonomous Administration, is witnessing the spread of solar energy systems, like most Syrian regions, but they seem to be limited in the homes and facilities of families living in a good economic situation, according to what Enab Baladi monitored.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

Is Syria a good country for solar energy?

Regarding wind energy, which is the second source of energy, Syria is not considered one of the countries that have a sufficient amount of wind throughout the year to produce electricity, and therefore the solar energy situation is regarded as the best in it.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

How much does a solar system cost in Syria?

The cost of solar systems for most domestic uses, outside the framework of production projects, ranges between 4 million and 14 million Syrian pounds, according to what Enab Baladi monitored from the websites of companies that install power systems in regime-controlled areas.

Are solar panels a household necessity in Aleppo?

Residents of the northern countryside of Aleppo, interviewed by Enab Baladi, considered that the instability of the electricity sector made solar panels a household necessity in recent years, as their use is not limited to the commercial sector only.
