Photovoltaic cells: These components in a solar panel convert sunlight into electricity. Battery Storage: The generated electricity is stored in batteries, ensuring a consistent energy supply for the LED lights, even during dismal weather or at night.

The PV modules in Ghana have degraded at faster rates than the standard warranty rate of 0.8%/year. It was predicted that 50% of installed PV modules studied would fail before the age of 15 years. The faster degradation rate in power output indicates that most of the installed PV modules in Ghana are unlikely to operate for the 25 years warranty.
