Jonathan Levesque, head of production innovation and technology development at EVLO told Energy-Storage.news in March, explained that the BESS solution the company was marketing at the time was less energy dense than some rivals" products, in part because the company traded energy density off for improved safety and quality.

Energy storage system can provide users with peak-valley spread arbitrage mode, standby supply guarantee and dynamic capacity expansion, etc. Hithium is devoted to creating safe and inclusive energy products. The energy storage system can be applied to residential energy storage, large industry and commerce, 5G base stations, micro grids, PV ...

He claimed it has ultra high energy density, exceptional safety standards and flexible module design. The BESS has an energy storage capacity of 2.3MWh and a nominal voltage of 1200V, with a voltage range from 800V-1400V. Energy-Storage.news has asked BYD"s press team for more information and will update this article or follow up in due course.
