From 1 February 2024, you won't pay any VAT on batteries for solar panels (previously you had to pay 20% VAT, unless you bought it as part of a solar panel system). So now you can install a standalone energy storage battery or add one to your existing solar PV system, and you'll pay 0% VAT. From 1 April 2027, this is set to increase to 20% VAT.

When upgrading the grid-tied system to an energy storage system the only part that changes is the AC Coupled battery inverter add-on. The existing solar PV system doesn't need to change at all. The AC coupled battery inverter is installed alongside batteries which is then connected directly to your panel or mains.
