Without frequent PV solar panel maintenance packages, you could end up with a solar panel system that isn't saving you as much on your energy bills as it ought to be. Considering most solar panels are expected to last for 25 years, and some solar PV systems even longer, you could lose out on a lot of free electricity in that time, if you allow solar maintenance to slip.

By having an accredited Solar PV professional carry out regular maintenance inspections, any small issues can be spotted early, which can potentially help to reduce large future maintenance costs. Lastly, as with all electrical systems, safety is paramount, and unmaintained systems could more easily develop faults causing electrical shock or fire.

Every homeowner with a solar panel setup should be aware of this. In this article, we will discuss everything a homeowner needs to know about the maintenance of solar panels to get the utmost efficiency and performance from the setup. 1) Cleaning your solar panels .
