Solar panel prices in the Philippines are affordable for the average household. What's more, homeowners are noticing up to 50% reduction in their monthly utility bill. Solar panels can pay for themselves in 5 years, and since each solar panel can last 25 years on average, it's considered better than a time deposit.

We started to develop solar panel recycling technology in 2013, to solve this problem. Recycling glass, weight of which takes around 70 to 80 percent of a panel, is impossible if there are metals. After crushing a panel as an industrial waste, it is extremely difficult to separate glass from metals.
