How do I choose a good solar junction box?

Usually cables with MC4 /MC5 connectors at the end are used. A good junction box keeps corrosion at the terminals to a minimum, as it will exclude water coming in. When purchasing solar modules, always have a look at the IP rating of the PV junction box. A completely water tight junction box carries IP 67.

How LONGi Solar module junction box works?

LONGi solar module junction box contains bypass diode which is in parallel connection with the cell string. If hot spot occurred, the diode will come into operation to stop the main current from flowing through the hot spot cells in order to prevent module over-heated and performance loss.
