PROMASOL is one of the leading manufacturers in Spain of solar thermal energy systems, being one of the few that manufactures all the main components of a solar thermal installation in its domestic production plants: tanks, solar collectors, structures, and thermosiphon or forced kits.

While some concentrating solar-thermal manufacturing exists, most solar manufacturing in the United States is related to photovoltaic (PV) systems. Those systems are comprised of PV modules, racking and wiring, power electronics, and system monitoring devices, all of which are manufactured. Learn how PV works.

A trusted leader in solar PV mounting systems. Designing, manufacturing and supplying. Since the incorporation of SUNFIXINGS in January 2011, we've strengthened our presence in the solar industry as a trusted leader in designing, manufacturing and supplying quality solar PV mounting systems. Through our continued flexibility and innovation ...

The Solar Container is unique in the world. It consists of a support frame attached to the container with hooks, and a fixing frame attached to the support frame with hinges. When extended onto the container, the fixing frame has an angle of 20 degrees (increased angle possible with the Solar Container Battery design).

The base of the Solarcontainer is a solid floor frame with the length and width of a 20f HC container. Mounted on this frame is the innovative PV rail system and the clever folding mechanism of the solar panels, which enable the transport dimensions and lifting points of a standard 20f high cube container, but still contain a maximum of highly efficient solar panels.

Photovoltaic container is a mobile device that integrates a solar photovoltaic power generation system, with a container structure that is easy to transport and deploy. It can quickly build a solar photovoltaic power generation system, ...

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20" sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.
