

Polaris solar energy co ltd Pitcairn Islands

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

Why do we have a Polaris star?

Our values are the pillars and guiding light of everything we do. They allow us to continue growing in a sustainable way and in accordance with what we see as fundamental. The Polaris star, a symbol we internally embrace, helps those who follow it determine their direction as it shines, to guide them towards a purposeful destination.

How do I contact the Polaris ethics helpline?

The Polaris Ethics Helpline can be accessed by calling any of the toll-free external phone numbers listed online at [and](#) filing online. Scan Polaris QR code
