

Powergroup com Afghanistan

War-torn Afghanistan is taking small steps to restore its power sector, which is in a shambles like its economy. Due to international isolation following the political crisis arising from the takeover of Kabul by the Taliban in August 2021, foreign aid and funding stopped completely, leading to a contraction in economic output.

Afghanistan is a landlocked country at the crossroads of Central and South Asia. The country shares borders with Uzbekistan, Turkmenistan, Tajikistan, Iran, Pakistan, China, and the disputed Kashmir territory. Afghanistan's current situation is deeply rooted in its complex past, including periods of monarchy, communism, civil war, and international intervention. The country's strategic location has made it a focal point for regional powers and global superpowers alike, shaping its modern history and current geopolitical significance.

As part of the Afghanistan Energy Hub agreement, through a three-phased plan, Siemens Energy will support Afghanistan's power sector by developing a reliable and affordable electricity supply, whilst addressing the efficient use of natural resources, to improve revenue streams back to the government.
