Voltage Optimisation Case Study : The Jockey Club The Jockey Club is the largest commercial horse racing organisation in the United Kingdom. It owns 15 of Britain's famous racecourses, including Aintree, Cheltenham, Epsom Downs and both the Rowley Mile and July Course in Newmarket. They aim to become carbon neutral for 2027

Voltage Optimisation (VO) operates as a precise and dynamic method deeply rooted in the principles of Ohm's Law. At its core, VO is designed to strategically manage the voltage supplied to electrical equipment, ensuring it aligns precisely with the specific requirements of each device. This process is finely tuned to optimise energy usage while maintaining

PowerHub offers free feasibility assessments to Bodies Corporate and Owners Corporations to demonstrate the tangible savings available. PowerHub provides a "turn-key" solution.
