

Global climate change will have an impact on Qatar's environment, economy, and possibly even its politics and security. Qatar is especially vulnerable to the effects of global warming due to a lack of arable land and water resources, which are ...

Qatar targets 20% of its electricity being generated from renewable sources by 2030, and a carbon zero footprint by 2050. This strategy has and will continue to drive significant investment in renewable energy infrastructure. Qatar's current primary renewable energy focus is solar energy and waste-to-energy sources. Solar power

The Qatar General Electricity and Water Corporation (KAHRAMAA) has recently launched the Qatar National Renewable Energy Strategy (QNRES). This strategy aims to increase large-scale renewable power generation to about 4 GW through the installation of distributed solar generation, up to around 200 MW by 2030.

Qatar has a long-standing energy relationship with India, having signed an SPA with Petronet LNG in 1999, but Qatar's LNG trade with India lags far behind its trade with China. In February 2024, QE renewed an SPA with India's Petronet LNG to supply up to 7.5 mtpa of LNG starting in May 2028.

The Center on Global Energy Policy (CGEP) at Columbia University SIPA is excited to announce the publication of *From Black Gold to Frozen Gas: How Qatar Became an Energy Superpower* by renowned energy expert and CGEP Advisory Board Member Michael D. Tusiani and award-winning oil industry journalist Anne-Marie Johnson. "From Black Gold to ...
