Will the Isle of Man have a solar energy farm?

Plans have been submitted for the Isle of Man's first solar energy farm. The proposed 84-acre development in the south of the island would generate enough electricity to power nearly 8,000 homes per year, developers said.

Will a solar farm help the island's long-term energy needs?

The firm is now asking for feedback on the proposals before formal plans are submitted. Stephen Snowdon, from the renewable energy company, said the solar farm would help the island "to take control over its long-term energy needs";

Will 84 acre solar farm be built in Malew?

The proposed 84-acre development in the south of the island would generate enough electricity to power nearly 8,000 homes per year, developers said. Peel Cubico Renewables said the Billown Solar Farm, to be built on agricultural land in Malew near Castletown, could be in operation next year if approved.

What is the 'Billown solar farm'?

Peel Cubico Renewables (PCR) have put forward the plans for what they call the 'Billown Solar Farm' to be built in Malew near Castletown. The plans coincide with the Isle of Man Government's Climate Change Plan and its commitment for the electricity sector to be 100% green by 2030.

Will a wind farm deliver a third of the Isle of Man's electricity needs?

Plans to build a wind farm capable of delivering around a third of the Isle of Man's electricity needs by 2026 are on schedule. Manx Utilities updated the Council of Ministers last week and outlined potential sites for the 20MW windfarm, alongside plans to install 10 Megawatts of solar on public buildings.

Can the Isle of Man provide stabilising power to GB or ROI?

Opportunities for the Isle of Man to provide stabilising power to GB or ROI from a large-scale baseload power station, e.g. biomass or a small modular reactor? Neither option is without challenge, but likely provide the greatest potential for export. These options have not been explored in the analysis.

Proposals have been put forward for a solar energy farm near Castletown on the Isle of Man. The Billown Solar Farm, which would be the first of its kind on the island, would be situated on...

## Rise up solar Isle of Man

o In December 2020, the Isle of Man Government launched its Future Energy Scenarios (FES) Strategy to determine the pathway to meet the following: o Electricity generation is now responsible for around 33% of all Greenhouse Gas Emissions on the Isle of Man.

However, they're quite expensive and take up more space than solar thermal. Solar thermal - Panels are added to your roof that contain tubes full of liquid. This liquid is then heated up by sunlight and flows into your cylinder. Solar thermal technology is more efficient than solar PV panels, takes up less space and works well for water heating.
