photovoltaic (PV) technology has become an increasingly important energy supply option. A substantial decline in the cost of solar PV power plants (80% reduction since 2008) 2 has improved solar PV's competitiveness, reducing the needs for subsidies and enabling solar to compete with other power generation options in some markets.

1.1.3 How much installed capacity could fit on the roof? How many panels can you fit in the roof? (use the equation from the handbook) Do you have the numbers for the AR (Area of Roof available for installation), CM (Capacity of PV Module), AM (Area of PV Module), and RCR (Roof Cover Ratio)? Has the roof been visited/checked?

The notice points out that the proportion of photovoltaic power generation that can be installed in the total roof area of Party and government organs shall not be less than 50%; The proportion of photovoltaic power
