

Rural solar generator scam

What is a solar energy scam?

The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency. If you agree to the scammer's offer, it could cost you tens of thousands of dollars.

What are energy scams?

Energy scams involve people pretending to be energy companies or regulators to get your money or personal information. These scammers may pretend to be your energy company, say they're from Ofgem or even from Energy Saving Trust to try and gain your trust.

Are free solar panels a scam?

Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more. Or check out the Department of Treasury's guidance on clean energy.

Should you choose a reputable solar energy company?

When temperatures rise, utility costs do, too. While reputable companies can help you save money with clean or solar energy improvements, scammers offer more than they can deliver.

Are solar salespeople a scam?

In May, the Nevada State Contractors Board started a solar investigations unit. But the scams continue. The sales pitch often starts with a solar salesperson knocking on the front door, calling on the phone or connecting on social media. Some scammers may say they're consultants from your power company, utilities warn.

Can a scammer sell your energy?

This is where a scammer claims to be from the energy regulator Ofgem. They may ask you to change your bank details or provide personal information to get funding or cheap energy. Ofgem will never ask you for personal information. They will also never sell you energy or show up at your house.

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar ...

Rural solar generator scam

For solar charging, you need a special solar adapter cable that some manufacturers include in the solar generator kit. An average solar charging time is around 5 hours, but large generators like the Renogy Lycan 5000 and the Bluetti EP500 have a dual-charging mode which lets you charge from the grid and solar at the same time.

DC Solar, led by founder Jeff Carpoft, falsely promoted mobile solar generator units, deceiving investors like Warren Buffett's Berkshire Hathaway. The fraud involved approximately 9,000 nonexistent generators.

I wanted to provide a relatively long term daily use update of the Point Zero Titan 1.0 solar generator which has been in constant use at our fishing cabin. The original purchase was made in 04/25/2020 and the generator and batteries were delivered 08/31/2020. COVID and supply chain problems...
