The purpose of monitoring and targeting (M& T) is to relate energy consumption data to its influencing factors to provide a better understanding of how energy is being used. The Dynergy M& T program will identify signs of energy waste, opportunities to save energy, track building energy demand and provide energy demand profiles and electricity ...

I am passionate about sustainability, and strive to gain new knowledge towards the engineering world. I

always give it all I got when I am working on something. I take criticism very well, and use it to try and improve on whatever I need to work on. My hopes and dreams are that one day we can push forward sustainable energy sources and move off of fossil fuels, so that future ...
