San Marino alectric renewables

San Diego may benefit from California's relatively progressive environmental policies, but the city is deliberately embracing renewable energy to reach its goal of 100% renewables by 2035. Its Metropolitan Transit Agency was the first transit agency in California to use biogas from renewable sources to fuel 100% of its fixed route bus fleet.

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings.

Renewable electricity is the share of electricity generated by renewable power plants in total electricity generated by all types of plants. San Marino renewable energy for 2022 was 0.00%, a 0% increase from 2021.; San Marino renewable energy for 2021 was 0.00%, a 0% increase from 2020.; San Marino renewable energy for 2020 was 0.00%, a 0% increase from 2019.
