

Saudi Arabia wison new energies co ltd

What is Wison Engineering doing in Saudi Arabia?

This project marks the first fine chemical EPC project that Wison Engineering has obtained in the Middle East market, as well as a new breakthrough in the private owner market in Saudi Arabia. Farabi Petrochemicals Group is located on the west coast of Saudi Arabia, primarily producing chemical products such as linear alkyl benzene and additives.

Why did Wison Engineering win the feed & EPC contract?

Wison Engineering won the contract due to its technical expertise, abundant experience in local projects, and established track record. This was the very first overseas FEED +EPC project in natural gas based methanol for Wison Engineering, marking another major milestone for the company.

Will Wison Engineering install new auto thermal reformers and methanol converters?

According to the current contract, Wison Engineering is responsible for installing new auto thermal reformers and methanol converters to reduce the plant's energy intensity and meet the new regulation set by the Saudi Energy Efficiency Center (SEEC).

Wison New Energies, a leading provider of clean energy technology service and solutions, is committed to providing the energy industry with highly integrated EPCIC solutions, including floating LNG facilities, modularized LNG plant, floating gas-to-power facilities, floating wind power and other clean energy solutions.

This project involved a new gas-based cracking furnace, extension of the pipe rack, a new decoking drum and its structure, a remote control room and an analysis house, as well as revamping of motor control cabinets in the substation.

Home Company News. Wison Engineering Wins First Overseas Natural Gas-to-Methanol EPC Project ... EPC Project. Release time: 2020-01-09 (SHANGHAI, Jan. 9, 2019) -- On January 1, 2020 in Jubail Industrial City, Saudi Arabia, Wison Engineering (Stock Code: 2236.HK) and the National Methanol Company (IBN SINA) signed the IBN SINA ATR ...

The existing facility was completed and put into operation in 1984, mainly producing methanol and MTBE.
