

# Security window to fix solar panels

How to protect solar panels from theft?

Immobilizing the panels will also protect them from theft. This is a technology that connects the photovoltaic panels to the inverter. You need to access the inverter to enjoy the sun's energy digitally. What this means is that if the solar panels get stolen without the inverter, the perpetrators will be unable to use them.

How do you secure a solar panel?

They are suitable for securing solar panels in place of standard fixings, using an M8 thread. These security screws for solar panels feature a unique fan-shaped drive, with a flange head and serrations under the head. It requires a special key wrench to insert and remove.

How do solar panel security screws work?

Our special solar panel security screws for external use help prevent theft in residential areas and solar farms. They require an insert bit or key wrench to remove, meaning that the worry about your expensive, environmentally-conscious panel will just disappear.

Do solar panels need security fasteners?

Security fasteners provide a solution to securing your solar panels without the extra material cost, as well as creating a difficult barrier for thieves to break through. Our special solar panel security screws for external use help prevent theft in residential areas and solar farms.

What is a Screwfix solar panel system?

With Screwfix's range of solar energy systems, you have access to high-efficiency solar panels and innovative inverters, ensuring optimal energy conversion. This section will cover how these technologies work together to power your home, reduce reliance on the grid and create potential long-term cost savings. Is a solar panel system right for me?

Do you have problems with your solar panels?

Nearly seven in 10 owners had had no problems with their solar panels in our survey of over 2,000 owners.\* The most common - and most serious - problem owners face is with the inverter. In some cases inverter problems mean you don't get any usable renewable electricity. It can also be a pricey problem to fix.
