Senegal: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Senegal's economy could grow six-times larger in the AC while limiting growth in energy demand to three-times its current level by utilising new gas resources and boosting the use of renewables in power. In the AC, gas meets a growing share of energy demand while traditional use of biomass starts to decline in rural areas.

Senegal needs to carefully manage its exposure to today's high oil price volatility by reducing fossil fuel subsidies and focusing on risk management. In 2022, Senegal spent almost 4% of its gross domestic product (GDP) on energy subsidies. The government pledge to reduce this share to 1% by 2025 is a major and welcome reform commitment.
