Will Senegal have a power grid by 2025?

One of its aims is to give everyone in Senegal permanent access to the utility grid by 2025. The main focus is on expansion in rural areas, such as with the ASER300 project, which is bringing electricity to 300 villages using mini-grids. Best of all, the technology for the energy supply comes inside a standard shipping container.

What is Senegal's aser300 project?

The government's ASER300 project is bringing electricity to 300 villages all around the country with mini-grids, which include PV modules, inverters, batteries, and cooling systems. Drought, arid and saline soil, lack of rainfall, forest dieback - Senegal is feeling the full impact of climate change.

Will Senegal give its population permanent access to electricity by 2025?

Senegal wants to give its population permanent access to electricity by 2025. However, half of the country's approximately 17 million residents live in rural areas, sometimes a long way from the national utility grid. The government is therefore looking to decentralized and environmentally friendly energy solutions.
