

Serbia automated vertical storage

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.

What is a modular vertical storage solution?

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to various payloads, heights, sizes and options.

What is a Modula automatic vertical tray warehouse?

Modula automatic vertical tray warehouses allow you to store goods in a clean, tidy, safe and fast-moving system, reducing the number of movements operators need to make and avoiding damage to your goods. Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency.

What are vertical storage solutions?

Vertical storage solutions are perfect for making the most of the height available in buildings, saving floor surface. These products are the ideal answer for a clean, tidy, safe and fast-moving warehouse.

Where can you find a modular lift automated vertical Carousel system?

You can find Modula Lift automated vertical carousel systems in shops, ironmongers', warehouses and manufacturing, as a production buffer or as storage space. The best automated warehouse system to recover space and increase security.

What is a modular vertical lift module?

Maximize the performance of every inch of your floor space with Modula Vertical Lift Modules. Modula Vertical Lift Modules (VLMs) are fully automated vertical storage systems that take up a minimum footprint by utilizing the ceiling height available.

Storage lift systems represent an elegant and ergonomic solution for vertical storage in the warehouse. In principle these systems are comprised of automated vertical shelves. A storage lift system is controlled and operated with warehouse management software.

Vertical storage systems present the goods to the operator, enabling significant savings in space, time and costs. Characteristics of a vertical storage system: The main characteristics of these automated vertical storage and picking systems are the greater use of space, the possibility of multi-order picking and, in general, the possibility of ...

Serbia automated vertical storage

Today we are one of the world's leading manufacturers of automated vertical lift systems and storage carousels for both industrial and office applications. Our range of high-tech automated solutions includes

The product models include automated vertical storage solutions, automated horizontal storage solutions, automated storage solutions for temperature-controlled environments, picking solutions ideal to optimise order preparation and robotic integrations such ...

Advantages of automated vertical warehouses: Space optimisation; Product-to-operator work philosophy; Elimination of article search routes; Reduction of order picking errors; Improved stock accuracy and control: significant improvements of nearly 100%. Productivity improvements: complemented by order picking systems for order grouping; Paperless

Nelt is the first logistics services provider in Serbia to implement the Vertical Lift Module, a storage system automating device. With this technologically advanced solution, Nelt has confirmed its leading position on the market in the segment of ...

Modula vertical automated storage solutions are designed to save space, save time and improve process efficiency. The automated vertical storage solutions have been designed following the "goods to man" principle : operators no ...

Vertical storage solutions are perfect for making the most of the height available in buildings, saving floor surface. These products are the ideal answer for a clean, tidy, safe and fast-moving warehouse. Benefits Automated vertical storage Modula Lift Modula Slim ...

The product models include automated vertical storage solutions, automated horizontal storage solutions, automated storage solutions for temperature-controlled environments, picking solutions ideal to optimise order preparation ...

Products. Key Benefits of Automation Transform your operations with Modula's solutions Automated storage solutions boost productivity and accuracy, increase storage capacity, and enhance worker safety Discover all benefits; Key ...

The best automated warehouse system to recover space and increase security. The Modula Lift vertical warehouse is the ideal solution for storing industrial and semi-finished products, spare parts and any kind of product in any industrial environment and every department.

Automatic vertical storage systems enable orderly, clean, safe, and fast storage of goods, reducing transport work by operators and avoiding damage to goods. The "goods to person" principle allows operators to bring products directly to the service opening, instead of having to navigate through the warehouse.

Serbia automated vertical storage

Modula automatic vertical tray warehouses allow you to store goods in a clean, tidy, safe and fast-moving system, reducing the number of movements operators need to make and avoiding damage to your goods. Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency.

Our automatic storage systems can save you up to 70% on existing floor space, reduce picking errors by up to 70% and decrease picking time by more than 60%. Computer-controlled, the vertical or horizontal storage machines easily integrate with your existing warehouse management system, but also operate effectively as a standalone solution.

Space-saving. Compact Vertical Storage Lifts store your items vertically, securely and in a controlled environment. We have a range of machine models (widths and depths) and we are able to specify machine heights in 150mm increments allowing us to maximise the storage available on any given footprint.

A vertical carousel (VC) is an automated storage and retrieval system that is designed to store inventory while reducing the floor area needed for storage, thanks to its upright and compact structure.. A typical vertical carousel comprises a series of carriers that are securely mounted on a closed-loop vertical track, all enclosed within a metal casing.

Today we are one of the world's leading manufacturers of automated vertical lift systems and storage carousels for both industrial and office applications. Our range of high-tech automated solutions includes the Rotomat; industrial and office carousels, the Lockomat; and the proven Lean-Lift; and Multi-Space; vertical ...

Modula is an automated vertical storage system with a series of trays which is designed to optimise space, work and warehouse management. It is the ideal solution for issues surrounding the management, picking and retrieval of components, as well as semi-processed and finished products, in a diverse range of Industries and applications. ...

Advantages of automated vertical warehouses: Space optimisation; Product-to-operator work philosophy; Elimination of article search routes; Reduction of order picking errors; Improved ...

The benefits of Modula vertical automated warehouses: Space Efficiency: Save up to 90% of the occupied floor space compared to traditional storage solutions. Time Savings: Expedite picking operations, enhancing overall efficiency. ...

Modula Vertical Lift Modules (VLMs) are fully automated vertical storage systems that take up a minimum footprint by utilizing the ceiling height available. These systems allow for large inventory of goods to be quickly accessible while being stored in a safe and secure environment and automatically delivered to the operators, with a simple ...

Serbia automated vertical storage

The vertical carousel storage system optimizes overhead space and picking productivity and accuracy using inventory management software. Skip to content +1 (800) 803-1083. ... The vertical carousel is an automated vertical storage system with rotating shelves. The shelves or carriers rotate like a Ferris wheel at the push of a button to bring ...

A vertical lift module, also known as tray lift and lift storage system, is an automated storage system for small parts. A vertical lift module resembles an oversized drawer cabinet made from metal with two large warehouse areas (carrier areas). The carrier areas can be compared to a ...

These vertical warehouses are designed to reduce occupied floor space by 90%, to increase productivity, to speed up picking throughput and to improve warehouse efficiency by reducing risks to both people and goods. They have long been synonymous with order, safety and automation for companies that adopt them in their production departments or in logistics.
