Solar Photovoltaic Panel Light Wiring

Then connecting all 6 arrays in parallel created a 7200W, 186V, 50A solar panel system. Grouping the panels 5 in series meant we had 6 total arrays (or 5S6P). It also meant that we had to create a bunch of solar wires to complete the series back to the combiner boxes. That meant buying our own MC4 connectors and hundreds of feet of PV solar wiring.
