

Solar company solar company New Caledonia

Who owns New Caledonia's energy?

The energy produced will be sold via a long-term power purchase agreement to Enercal, a semi-public company majority owned by New Caledonia. A similar (but smaller) project has also been financed at the same time in Temala in the North Province. It is the first photovoltaic power plant on customary land.

What is New Caledonia's largest solar power plant?

The project involves building and operating a solar power plant with a capacity of 11.2 MWc in the South Province, in Boulouparis. The power plant, which is the largest existing solar facility in New Caledonia, comprises 43,000 panels covering 20 hectares. It was commissioned at the end of April 2017.

Why is AfD cofinancing the largest solar power plant in New Caledonia?

AfD is cofinancing the largest solar power plant in New Caledonia to allow cleaner energy to be generated. 43,000 photovoltaic panels will be installed, with a capacity to produce electricity for the equivalent of 5,400 households.

The company has a stake of 100%. Enercal Poya Solar PV Park is a ground-mounted solar project which is planned over 142,790 square meters. The project is expected to generate 48,600 MWh electricity to offset 35,808t of carbon dioxide emissions (CO₂) a year. The solar power project consists of 57,690 modules.
Development status

The construction of the solar plant was initially financed by a registered offering of Caledonia's shares in the US in 2020 and this raised \$13 million through the issue of 597,963 shares. Since commissioning in February 2023, the solar plant has generated over 47,350 MWh of power, and profits attributable to the solar plant for the year ended ...
