Can Zimbabwe become the voice of solar energy?

We aspire to become the voice of solar energy. Zimbabwe needs about 2,200 megawatts of electricity at peak consumption but generates just below 1,300 megawatts, while relying on imports to fill the gap. Due to ageing equipment, power generation often disrupted following breakdowns. In most cases, the generators operate below capacity.

How much electricity does Zimbabwe generate?

Zimbabwe relies heavily on hydro-powered resources to generate electricity. As per the International Renewable Energy Agency (IRENA), Zimbabwe generated around 7 TWh of electricity in 2021 via hydro-powered resources, accounting for 58.2 % of the total electricity generated in the country.

What is Zimbabwe's energy demand?

Zimbabwe's increased economic activity in various sectors, including housing development and construction, has fueled a demand for energy and electricity in general. The Government of Zimbabwe estimates the surge in power demand to peak at 2000 MW in 2023, as compared to 1200 MW in 2021.
