

Solar log 1000 Namibia

How does solarlog1000 connect to the Internet?

3 Manual 3.5.1.1.1 Internet access Please check here which way SolarLog1000 is connected to the internet. Depending on the settings, various options appear at the bottom area of the screen. If the network router is selected, the SolarLog directs all internet-related data via the network interface to the Gateway address.

How do I dial-in the solarlog1000?

3.10 Dial-in using an Analogue Modem The SolarLog1000 can be dialled into via the SolarLog1000 modem package(Home/Industry). That means the SolarLog can be called up and operated via a normal telephone line. This is very handy,if the SolarLog remotely monitors a plant and you need to make changes to the configuration later on down the line.

Can a solarlog1000 be run on a different voltage?

Other notes: The SolarLog1000 operates on 12Volt DC (12VDC,max. 24VDC). Running the unit on a different voltage will invalidate the warranty. Installation he installation of the SolarLog1000 must take place indoors and protected from dust. For outdoor and dusty environments,the SolarLog needs to have appropriate protective hous- ing.

Is VDE- 4110 compatible with the solar-log base?

VDE- 4110*with the Solar-Log Base - compliant,safe,flexible and convenient. In 4 simple steps to successful VDE commissioning with our support. The Solar-Log Base is compatible with all standard inverter models. Compatible battery storage nected. You can find details on these in our component database. 0 interface.

Which Inverter models are compatible with the solar-log base?

The Solar-Log Base is compatible with all standard inverter models. Compatible battery storage nected. You can find details on these in our component database. 0 interface. For connecting components with RS485 or RS422 interfaces. For connecting to the internet and components with Ethernet interface. configurations,and backups.
