What is a solar O&M plan?

Solar O&M plans protect your solar panel system and address problems promptly so you don't lose out on energy generation. Different O&M options include plans with a dedicated provider, services directly from your solar panel system installer, and inverter monitoring.

What is Solaro & how does it work?

SOLARO also offers students diagnostic assessments with detailed descriptions associated with their responses to gauge what they know and where the learning gaps still exist. SOLARO is a digital resource, compatible with phones, tablets, and full computers with online and offline access.

Why should students use Solaro?

" SOLARO provides an impressive interface for students and parents within our branches. Many students do not have access to curriculum-based resources--their only way to do that is by visiting their local branch... We have been very happy and content with the addition of SOLARO to our repertoire.

How can I use Solaro as a supplemental educational resource?

It is easy for clients to log in and start using SOLARO as their own personal supplemental educational resource. SOLARO is available on any desktop, laptop, or mobile browser, as well as in print. Libraries are able to provide students with a resource they can use on the premises and continue to access around the clock from home or school.

What is a dedicated solar O&M provider?

A dedicated O&M provider is a third-party company (not your solar installer or equipment manufacturer) that you hire to monitor and maintain your solar panel system. Under the umbrella of dedicated solar O&M providers, you can choose from several types of plans. Three of the most common plans are preventative, corrective, and real-time.
