

Solar power lamp instruction manual

How do I install a solar light?

We advise putting it on a wall or roof. The electric wire is about 5m long so bear this in mind when locating the solar panel and light. Attach the solar panel using the flat screws and raw plugs. Adjust the angle of solar panel to make sure it can collect as much sunlight as possible. Decide where to put your light.

How do you charge a solar light unit?

Plug the cable from the panel into the solar light unit. Please charge the unit for 3 days of good sunlight, or 7 days of overcast weather to give it a good base charge. Push the power button on the front of the light once to turn on. 6. TROUBLESHOOTING INFORMATION The light is dim or flashes

How to clean a solar lamp?

Do not use any type of solvent for cleaning and be careful not to put too much pressure on the solar panels while cleaning. Make sure that the solar lamp is not being affected by any other light source. Ensure the solar lamp is not positioned in the shade during the day. Make sure the switch on the lamp head is in either the Low or High position.

How to install a solar lamp post?

NOTE: For best results, the solar lamp post must be charged for two sunny days on the "ON" position. Attach the body (B) to the stem (D) with the four supplied screws, as shown. Place the lens and cone (C) in the body (B). Turn on switch to desired setting. 5. Attach Side handles provided. 7. Assemble pole by screwing the four pieces together. 4.

Where should a solar lamp be placed?

For optimum light duration throughout the night, it is very important to place your solar lamp in a spot where it will receive the maximum amount of direct sunlight throughout the day. NOTE: For best results, the solar lamp post must be charged for two sunny days on the "ON" position.

How do I know if my solar lamp is good?

Make sure the switch on the lamp head is in either the Low or High position. Check that the batteries are installed correctly. NOTE: The performance of the solar lamp will vary with the time of year. It will deliver more light when it has had a full day in the sun rather than a day in overcast weather.
