W Peak Capacity of Solar Panel = 1924 Wh /3.2 = 601.25 W Peak. Required No of Solar Panels = 601.25 / 120W. No of Solar Panels = 5 Solar Panel Modules

We can all work on one diagram together at the same time while we chat. In the meantime, the tools I use (and I do not mean to imply I do any real schematics) include Google Draw (free, cloud, part of Google Docs), GIMP (free, desktop) and flameshot (free screenshot tool for Linux Gnome desktops) for quick markups.

What is a Single Line/Schematic Diagram ? A Single Line Diagram (SLD) (also know as Schematic Diagrams) is a simplified representation of the components in an electrical system and denotes how the components are laid out. It can also give key information on installation details including voltage and current of stringing in the system.
