

Solarx smart energy Grenada

How much does solar cost in Grenada?

According to data from 2014, the costs of utility-scale solar in Grenada are estimated to be between \$0.21/kWh and \$0.44/kWh; wind costs are estimated to be between \$0.05/kWh and \$0.20/kWh.

Does Grenada have solar power?

Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day. A 2- to 4-MW PV installation is planned, but no utility-scale solar plants are currently in operation.

Who is SolarX?

SolarX is a collective of experts striving to build a more sustainable world powered by renewable energy. We make the transition to renewable energy trouble-free and affordable for our clients households. We approach each new client by trying to understand their pattern of energy consumption and their overall electricity needs.

What payment options does SolarX offer?

We offer a number of payment options that include partial or full financing, in order to make the sustainable energy accessible to everyone. SolarX is a collective of experts striving to build a more sustainable world powered by renewable energy. We make the transition to renewable energy trouble-free and affordable for our clients households.

Why should you choose SolarX?

Benefit from the latest solar powered technology to convert excess electron energy into electric power. SolarX has partnered with the Nation's leading Rooftop Solar Contractor*, Titan Solar Power, to deliver world-class installations with industry-leading customer experience. Quality of work that has stood the test of time.

Who makes energixpro EV charger?

Our EnergieXPro EV Charger has been manufactured for our company by Gersan Elektrik, a leading company in the electrical industry. This smart type AC charging station has single-phase (1P) 16A (3.7kW) to three-phase (3P) 63A (44kW) charging. All our PV Modules are Individually Optimised for Better Management and Monitoring.

Global energy shortage, Electricity prices continue to rise, use more of solar photovoltaic, so that you can have electricity available at any time and reduce electricity expenses, without the trouble caused by skyrocketing of electricity prices. To help build up a zero-carbon society, SOLARMAN, as a smart energy expert, is on the way.
