

Soleil power Latvia

Soleil Power will build on existing partnerships to test these products and build a two-wheeled EV and battery swapping/charging infrastructure. Much of the cost associated with repurposing EV battery products depends on the complexity of disassembly, testing and rebuilding used battery modules. The new designs will streamline and accelerate ...

Soleil Power recently had the honor of hosting a team from Innovate UK and the British High Commission, who visited to learn about our latest projects and explore the impact of their ongoing support for our research and development. It was a moment of pride and excitement as we showcased the strides we're making in

It will be European Energy's first project in Latvia and the largest solar park in Latvia. The Targale solar park is expected to be connected to the electricity grid in 2024 and will generate approximately 110,000 MWh of green energy annually, providing around 52,000 households with their annual electricity consumption.

A major new solar power plant opened September 25 in Latvia on the outskirts of Cesis. The new plant will supply 10,000 households in Cesis and the surrounding area with green electricity. 12 million euros of Latvian private capital have been invested in the creation of the new power plant.
